

AIR SHOWER

- Air Shower is installed at the entrance and exit of the Clean Room and uses a high-velocity cleaned air jet to wipe off dust and bacteria from entrants and incoming media

CLEANROOM WASHER & DRYER

- It ensures fast, thorough drying without contact with foreign media that can shed particles and germs.

CLEAN BENCH

- Economical way to achieve clean air environment.
- Very simple and rarely need maintenance other than periodic filter change.

PASS BOX

- Interlocking system minimize cross contamination while transferring products or goods between two different clean zones.

CLEAN WAGON

- Battery charged, flexible and highly mobility.
- Maintain positive pressure prevents contamination from surrounding; maintain cleanliness up to Class 10 within the chamber.

LAMINAR FLOW PASS BOX

- This pass box has a self equipped motor with HEPA filter to re-circulate and generate laminar flow cleaned air inside the chamber.

AIR-SHOWERING PASS BOX

- Interlocking door.
- Equipped with air showering feature.
- Complete with roller conveyor platform.
- Custom made product.

GARMENT STOCKER

- Purge and remove particles such as dust and lint ingress on the clothing fabric.
- Multi-directional powerful air jet from the nozzles produces a strong Scrubbing-And-Brushing force

BIO-HAZARD CLEAN BENCH

- Prevent contamination or infection of live stock.
- UV germicidal light is optional.

BIO-HAZARD ISOLATOR BL-3

- Prevent contamination or infection of live stock.
- Avoid dangerous virus or bacteria from leaking to ecosystem & environment.

**BIO-HAZARD
ISOLATOR CLASS 3A**

**HOSPITAL ISOLATOR
BED SYSTEM**

- Suitable for skin burn patient.
- UV germicidal light is optional.

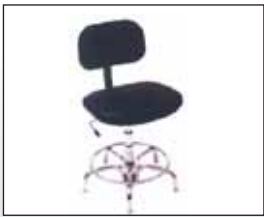

CLEAN PARTITION

- Ultra thin construction.
- High Mobility.
- Spot clean air zone.
- Suitable for skin burn patient.

CLEAN BOOTH-CLASS 10

- Modular clean booth.
- Pre-fabricated, easy and fast field installation.
- Custom make to suit site dimension and cleanliness requirements.

CHAIR

- ESD safe featured prevent damage from static discharge problem.
- Durable, non flammable comfort, soft, level adjustor.

SS MAC

- Small self-equipped motor filter unit for small clean cabinet or mini environment.

**CLEANROOM
VACUUM CLEANER**

- ESD safe body.
- HEPA filter discharge air.
- Large capacity filter bag.

TEAR DROP LIGHTING

- Nice appearance.
- Easy installation.
- Continuous design, see no gap in between two tear drop lighting.

PRESSURE RELIEF DAMPER

- To balance extra pressure built up in a clean room.
- Excellent performance in maintaining positive pressure in clean room and prevent draw in of particle.

PARTICLE COUNTER

- Suitable for pharmaceutical environment.
- Zero particle emission.
- 1 m³ in 20 minutes.
